COS30045 Data Visualisation

Class 6

Agenda

- Demonstration 2 requirements
- D3 data vis programming
  - Histogram with filters
  - Line chart with tooltips

Project teams formed in Week 8 by tutor
Team members must be at similar skill level
Team size: 1-3 (MAX)
Team must be joined by Week 9

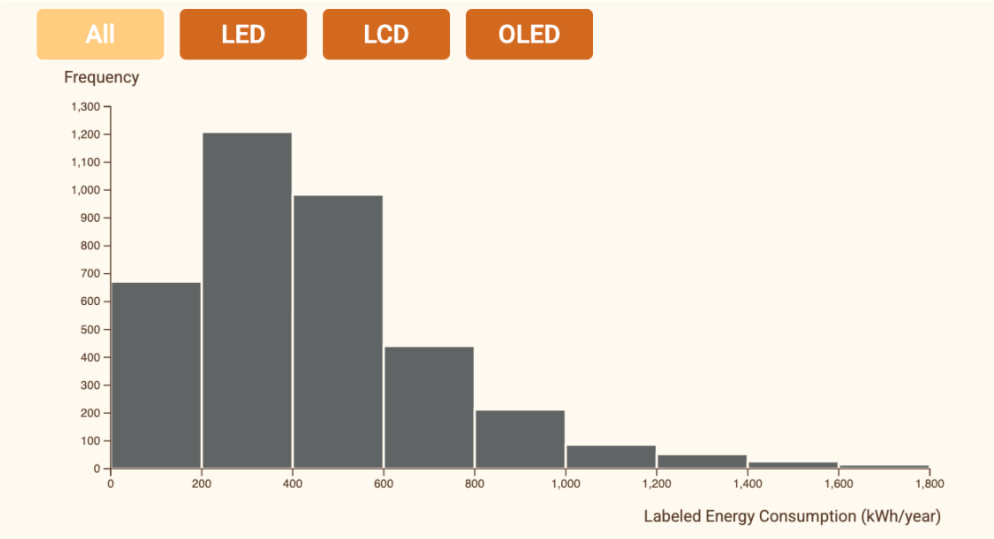

Exercises

Exercise 6.1: Build Histogram

Exercise 6.2: Add filters to histogram

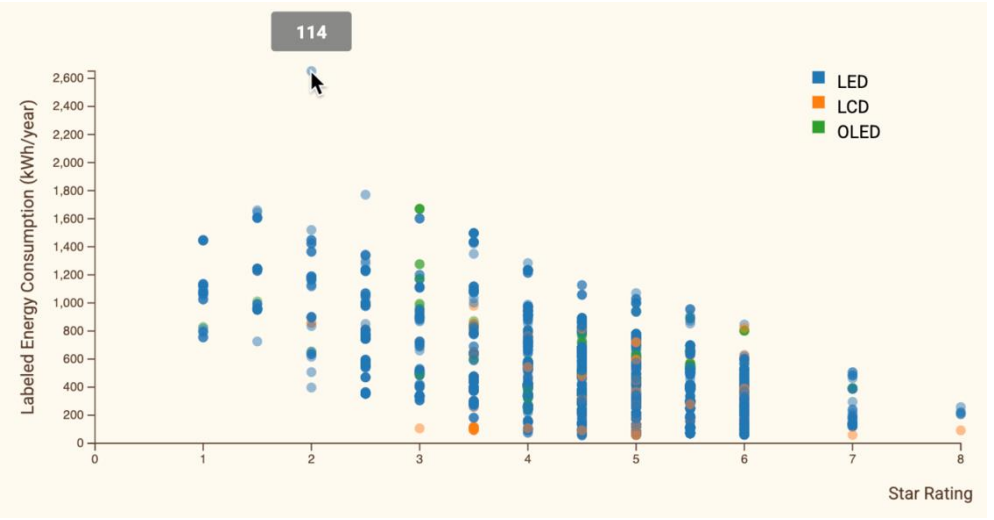

Exercise 6.3: Build scatterplot

Exercise 6.4: Add tooltips to scatter plot

Extensions:

- Add filter for TV size to histogram
- Add tooltip to histogram
- Add TV brand/model/screen size to scatterplot tooltip
- Add filter for screen tech to scatterplot
- Re-scale axis after filtering (histogram)

SWINBURNE UNIVERSITY OF TECHNOLOGY

Skills to practice for Project

- Filters
- Animations
- Tooltips

Project Stand-Ups
- Week 10 (Team)
- Week 11 (Team member 1)
- Week 12 (Team member 1)

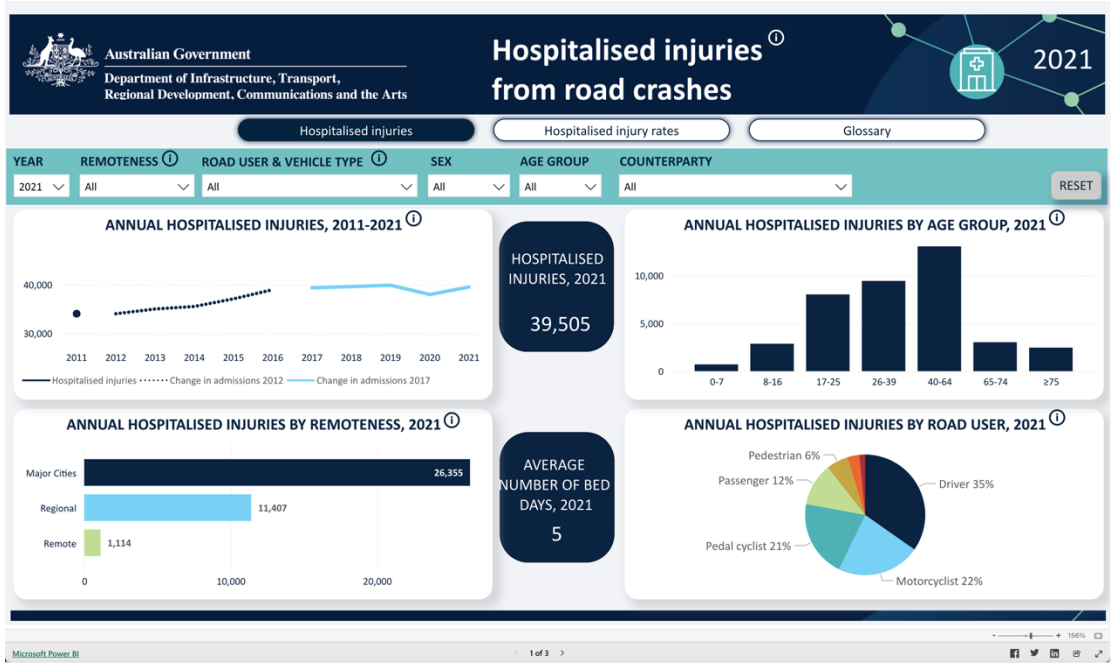

Submission – Week ’13’

Project Teamwork

Students will be required to **work on their own** if they:

- have NOT made an effort to be placed in a team before Week 9,
- have NOT meaningfully communicate with their team before Week 9 Class, or
- have NOT contributed to teamwork before Week 10 Stand-up.

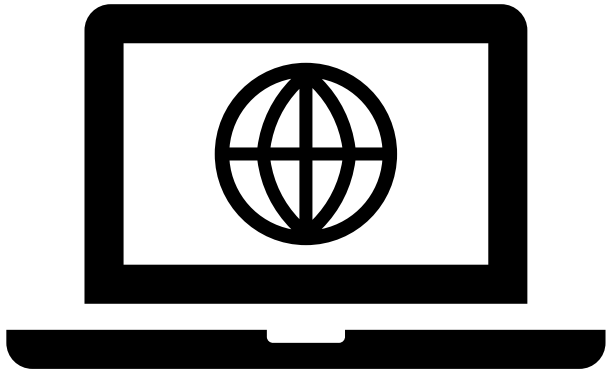

Preference will be given to forming teams of students with similar levels of engagement and skill set.

Exercise Demonstration 2 (Week 7)

Be prepared to demonstrate:

- manipulation of SVGs
- binding data to SVGs, reviewing DOM, writing data to console
- loading data into D3 from csv files
- construction of basic chart types (e.g., bars, scatter, line, pie, histogram)
- scaling and axis construction
- interactions (tooltip/filter)
- use of GenAI

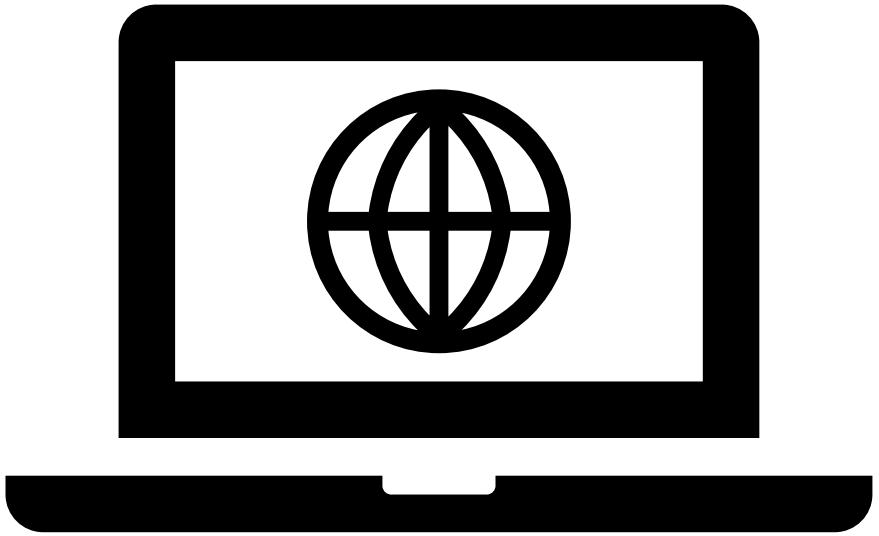

SWINBURNE UNIVERSITY OF TECHNOLOGY

Exercise Demonstration 2 (Week 7)

Links to GitHub classroom repositories (submit link as a comment) for:

- Exercise 4.1 SVG house
- Exercise 4.3 -4.6 Website with bar chart
- Exercise 5 Multi-chart page
- Exercise 6 Interactivity

Host your website pages on Mercury:

- Exercise 4 (complete)
- Exercise 5
- Exercise 6

Or - Combine all pages on one website (on different pages, include navigation between pages and context for charts)

Next Week

Exercise 7: Visualisation design

- Catch up on programming
- Design process
